SUMMARY

Computer Science undergraduate in the pre-final year with a strong foundation in Java, data structures, and object-oriented programming, aspiring to build expertise in backend development and scalable API-based systems.

EDUCATION

C. V. Raman Global University, Bhubaneswar

Aug 2024 - Aug 2028

Bachelor of Technology (BTech), Computer Science (CGPA:8.03)

TECHNICAL PROJECTS

Car Price Predictor (Machine Learning Project)

March 2026

- Built and optimized a Car Price Prediction model using Python, Pandas, NumPy, and Scikit-learn, implementing Linear Regression and Random Forest algorithms.
- Performed data preprocessing, feature engineering, and model evaluation using R^2 Score and Mean Absolute Error (MAE) to improve prediction accuracy.
- Deployed the model as an interactive web application using Streamlit for real-time price prediction.

Orbyt – Student Support Platform

February 2025

- Developing a web platform using Java and structured backend design principles.
- Exploring REST API integration and database-backed data handling.
- Applied exception handling and file handling to improve program robustness.
- Strengthened problem-solving through structured project assignments

TECHNICAL SKILLS

- Languages:** Java, Python, SQL.
- Web-Technology :** Html, Css(Tailwind, Bootstrap), JavaScript.
- Framework:** Pandas, Numpy.
- Developer Tools:** Git, GitHub, Jupyter Notebook, VS Code.

RELEVANT COURSEWORK

- Data Structures
- OOPs
- Database Management
- Artificial intelligence
- Computer Networks
- Algorithms Analysis

ACHIEVEMENTS CERTIFICATIONS

Git Skill-Up Certification

Earned certification in advanced Git version control, including branching strategies, merging, rebasing, and collaborative development workflows using distributed version control systems.

The Java Language Certification

Validated proficiency in core Java concepts including OOP principles, exception handling, multithreading basics, collections framework, and fundamental language mechanics.

INNOSPRINT-2K25 Ideathon

Participated in a competitive entrepreneurship-focused ideathon, contributing innovative ideas, problem-solving strategies, and business-oriented technical solutions in a team-based environment.

Build w/ Gemini Hackathon 2026

Participated in the AI-focused hackathon, gaining hands-on experience integrating AI APIs into web applications and understanding real-world AI deployment workflows.
